

MEP CENTER

THE UNIVERSITY OF UTAH

Manufacturing Extension Partnership Center

Before you start your Discovery Session with us, please complete the following questions and email to Mark Poole, Educations Program Manager at mark.poole@mep.utah.edu

Discover Session Questions	Yes	No
Is your company currently a contractor for the Department of Defense, or are you a supplier to a company that has federal contracts?		
Is your company currently bidding on or plans to bid in the future on federal contracts?		
Have you been told by one of your vendors or a customer that you need to become compliant with NIST 800-171 requirements or some other federal cybersecurity guidelines?		
Does your company currently have a security plan and/or policies that address cybersecurity and the protection of important data, both in digital and printed formats?		
Are you or your staff qualified to objectively evaluate your own IT systems and related security policies?		
Does your company currently have an employee responsible for your IT systems that is trained or familiar with cybersecurity?		
Do you currently outsource your company's IT needs to a third party?		
If you do data backups, are they stored off-site and/or updated to a cloud service?		
How many company computers/terminals are on your network (include CNC machines, robots and other pieces of equipment if connected)?		
How often do you back up the data/systems on your computers?		
Do you use an encryption tool for emails and data transmissions?		

Do you conduct regular training on cybersecurity with your employee; i.e., how to avoid phishing emails, ransomware, password updates, etc.		
How many employees does your company have?
