

## ADVANCED TECHNOLOGY SERVICE DESK

**Struggling with an impossible technical problem limiting your competitiveness? Whether it is material, sensor, electronic, data, chemical, civil or mechanical, let us tap into our resources to bring you a solution.**

### **How It Can Help:**

- Developing new products or enhancing old ones.
- Seeking to enhance their data collection or data use
- Product problems that could be solved with research
- Marketing questions that could be gleaned from customers
- Interest in teaming with the government and need help where to start

### **Detailed Description:**

The Advanced Technology Team has direct contact or line-of-sight connections to the following resources:

MANUFACTURING USA: 16 Institutes funded with over \$1B to help create collaborations to spur US Manufacturing Innovation.

FEDERAL LABORATORY CONSORTIUM: 350 facilities across the US spending \$150B annually on R&D.

MEP NATIONAL NETWORK: Impact Washington is parts of a 51-state center network with over 1400 field staff to help solve process improvement and connect you to your next partner

### **How Much Does it Cost:**

- Understanding Connecting is free. Other partners may charge.

### **What to Expect:**

The process begins identifying the hurdle you are trying to overcome. It ends with a technical advice and a new connection.

### **How to Get Started:**

- Contact: <https://www.impactwashington.org/advanced-technology-service-desk.aspx>
