

NASA TECHNOLOGY IS YOUR BUSINESS

NASA Technology Transfer Expansion (T2X) accelerates the commercialization of NASA-developed technology and new venture creation through strategic partnerships, entrepreneurship activities, and engagement with academia.

How It Can Help:

- Access to patented NASA technology.
- Insight into technology commercialization.
- Bridging sustainability gaps for entrepreneur.
- Advancing innovation in diverse communities to advance innovation.
- Heightening the impact of NASA investments on state and local economies.

How Much Does it Cost:

- There is no cost associated with T2X.

What Can I Expect:

From coast to coast, T2X engages entrepreneurial and investment communities, local and state government, academia, and others who share common interest in solving the challenges of tomorrow, today.

How to Get Started:

Visit the T2X website: technology.nasa.gov/t2x to learn more about NASA T2X and search the NASA Patent Portfolio to find technology solutions: <https://technology.nasa.gov/patents>.

Or contact: hq-t2x@mail.nasa.gov to learn more about T2X.
